**Grassroots Academy** has the culture of producing toppers year after year in nearly all different MSc. Entrances. It's because of detailed analysis of every topic and an assumption that we have to start every subject from very basics. The teachers here are experts in their own subjects and dedicate immense time for doubt clearing.

Another factor that separates us from others is the timely, detailed and complete coverage of the entire syllabus and not just important topics, because every topic has its own relevance and weightage.

The detailed study material and books which are provided to the students are highly organized and easy to read and cover all the aspects of the syllabus so students do not have to search elsewhere.
